AROMATICS OF UNUSUAL MERIT

J. MÉRO & BOYVEAU

BÉNARD & HONNORAT, Succ.

GRASSE

(Alpes-Maritimes)

FRANCE

22501443685

We take pleasure in submitting to our friends a List of Aromatic
Products in which we take a special pride.

Established in 1832, practically a century ago, it has been
the constant aim of the Firm to Produce the finest
of materials and no efforts, pain or money have
been spared to attain this object.

The increased Patronage, which has marked

our four score years in business,
is a sure mark that we have
succeeded and, to day,

we can proudly state
that goods branded
with the initials

J. M. B.

are recognised
standards the

World

over.

J. MÉRO & BOYVEAU, BÉNARD & HONNORAT, Succsrs. — GRASSE (France)

One of the Extracting Halls at our Tournamy Factory, used exclusively for the Petroleum Ether Process.

FLORAL ESSENCES

Aspic
Cassie
Foin Coupé
Jasmin
Jonquille
Lavender
Mimosa
Narcissus
Oakmoss
Orange Flower
Rose Centifolia
Tubereuse
Vegetable Amber
Violet Parma
» leaves

We have at Tournamy (Mougins) the most up to date Factory in the heart of the flower fields; jasmin and rose plantations border our grounds and the crops are brought practically from the bush to the stills, without wilting.

The latest improvements in the extraction stills allow us to obtain the essences of the flowers as nature actually creates them and we can assert with pride that our concretes, absolutes and natural liquids are to day the best that modern knowledge and science can produce.

“LA PARFAITE” pure fresh Fruit Extracts

for (cloudy) Hygienic Fruit drinks

Fresh Lemon Extract - Fresh Orange Extract, - Fresh Tangerine Extract

These pure fruit extracts differ from those hitherto known for this kind of product.

For simplicity and for the most perfect preservation, they are sold in two distinct parts consisting of :

1. The pulp and portion of the rind crushed and then concentrated in the form of paste ;

2. The fresh fruit itself condensed to a syrupy consistency. The reunion of these two elements reproduces the fresh fruit in its entirety.

One dosis, consisting of one jar of paste and two bottles of fruit juice, is sufficient for 50 litres of syrupy extract, of which 1 litre in its turn will give at least 50 glasses of pressed fruit juice (or fruit crush).

The syrupy extract so obtained remains perfectly combined.

It is not necessary to shake or stir. It is of perfect preservation and the aroma retains its fineness and freshness.

No portion separates out from the mass, and it does not assume the darkish aspect so strongly objected to by the consumer.

It is very economical as no acid or colouring have to be added.

Ask us for a sample of the complete syrupy extract, ready for use, sufficient for 3 glasses.

Our artistic labels (registered model pattern) are only allowed to be used by buyers of our products. These free labels can only be printed with name in quantities of not less than 1000.

The illegal use of these labels will lead to prosecution according to the law.

Concentrated fruit juices (Non-alcoholic)

Apple 10 times concentrated
 Apricot 10 » »
 Blackberries . 10 » »
 Blackcurrants 10 » »
